WHAT IS THE FIBER PANEL AND WHO WE ARE ?

• Fiber panel is a fiber glass based marble and stone powder reinforced decoration material applied as a plate containing special formulas.

Why should you use fiber panels instead of styrofoam and real stone?

- It gives the appearance of natural stone with its appearance and texture.
- Non-flammable. Can be used in places exposed to intense sunlight or heat.
- Not affected by water and humidity. It can be used easily in places such as kitchen and bathroom.
- Average weight of 5-8 kg/m2 and 3-5 cm thick
- Product size is usually 133×285 cm and may vary by a few cm depending on the model.
- With the help of screws and dowels, it can beapplied to all surfaces with finished rough construction, including ceiling surfaces.
- Washable and wipeable. Does not require extra care.
- Oval and mobile forms can be given thanks to its flexible structure.
- It can be easily painted in the desired colour.
- A natural appearance is achieved on the applied surface due to pattern continuity of all models,
- It does not contain any carcinogenic substances and substances harmful to health. Environmentally friendly.
- It can be easily cut to the desired size with a jigsaw or diamond saw.

ADVANTAGES

- Discover the advantages of combining aesthetics and convenience in the same product
- It can be easily applied to all surfaces with semi-finished construction.
- It eliminates paint and insulation costs.
- It can be easily used indoors and outdoors.
- It is absolutely not affected by external factors such as rain, sun, heat.
- It feels like real stone when touched.
- It eliminates problems such as regional spillage and joint gaps that occur in natural stone applications.
- Thanks to its flexible structure, it can be applied to areas such as vaults, arches, fireplaces and columns can be covered.
- Thanks to the screwing method, its application is extremely practical and effortless, especially for businesses that require decoration changes.
- It can be easily cut and drilled. Decorative materials can be hung on the coated surface.
- It can be applied as portable for decor design in showcases and fair stands.
- It eliminates construction pollution such as cement, plaster, sand.
- Thanks to its easy disassembly feature, it can be resized after dismantling and applied to a different area.
- It is more practical, lightweight, long-lasting and useful compared to natural stone applications.
